

GREAT DANE

AUSTERE CHANDELIER IMPORTANT INFORMATION

Austere Chandeliers are an LED light array (6.2w per light-element).
All Austere Chandeliers come with a Built-In (AKA Remote driver) **1-10V & Push-dim driver**.

The chandeliers **MUST** only be connected to the Trizo21 driver supplied (otherwise the warranty is voided). It is important to note that these drivers can be placed in the ceiling cavity or remotely if need be. It must be placed within a 15 meter radius from the light source.

Each driver measures L360mm x H21mm x D30mm; see below image.

Please ensure clients refer this to their qualified electrician to confirm they have adequate ceiling clearance for the driver to be installed.
